

"Daffodils" by William Wordsworth - Summary

In "Daffodils," the poet William Wordsworth describes a memorable experience when he wandered lonely as a cloud and stumbled upon a beautiful scene of golden daffodils fluttering and dancing beside a lake and beneath trees. This vast expanse of daffodils seemed never-ending, appearing like stars twinkling in the Milky Way.

The sight filled the poet with immense pleasure and joy. He realized that while the actual moment of seeing the daffodils was beautiful, the memory of the scene continued to bring him peace and pleasure even when he was in a vacant or contemplative mood. The poet concludes by expressing the lasting impact of nature on the human soul, emphasizing the comforting and uplifting power of its beauty.
